MOBILE LEADERSHIP. FULL-STACK DELIVERY.

PORTFOLIO

M Anjasfedo Afridiansah

Software Engineer

Mobile Team Lead & Full-stack Developer

BASED IN BENGKULU, INDONESIA

Mobile apps, web platforms,
IoT backends, and cloud systems.

Explore the live portfolio

Engineering across the whole product.

Mobile, web, backend, and deployment — connected by hands-on delivery.

M ANJASFEDO AFRIDIANSAH

Bengkulu, Indonesia

I lead mobile engineering and build full-stack systems end to end, from Flutter and native apps to web platforms, Go backends, IoT telemetry, and cloud deployments.

MOBILE ENGINEERING

Flutter · Android Kotlin/C
iOS Swift · Team leadership

FULL-STACK DEVELOPMENT

React · Next.js · TypeScript
Laravel · Vue · Node.js

BACKEND & IOT

Go · REST APIs · MQTT
PostgreSQL · MySQL · Redis

CLOUD & DELIVERY

AWS · Google Cloud · Docker
Coolify · CI/CD · IaC

Lead, build, and share knowledge.

Engineering roles across product teams, cloud infrastructure, and university teaching.

CURRENT ROLE

Mobile Team Lead & Full-stack Developer

Perseverance Technology Indonesia (CV Aranus Technology)

Jun 2024 — Present · Full-time, hybrid

- Lead Flutter and native mobile engineering across the Taiwan and Indonesia entities.
- Own full-stack web architecture, server-side logic, cloud deployment, and maintenance.

Software Engineer

PT Rafflesia Agro Investama

Aug 2025 — Apr 2026 · Part-time, concurrent

Go APIs, MQTT telemetry, Flutter foundation, and Chikora web showcase.

DevOps & Solutions Architect Intern

Elitery · PT Data Sinergitama Jaya Tbk

Nov 2024 — Jan 2025

AWS architecture, CI/CD pipelines, IaC, and infrastructure optimization.

Frontend Engineer Intern

PT Langgeng Inovasi Teknologi

Jun 2024 — Aug 2024

Responsive UI implementation, code reviews, and Agile delivery.

Assistant Lecturer · Universitas Bengkulu

Web Programming / Framework Programming

Jan — Jun 2024 / Aug — Dec 2024

Hands-on teaching in React, Laravel, MVC, and REST APIs.

Recruitment, end to end.

LATUN Jobs · A recruitment platform for marine conservation roles in Bengkulu.

LATUN JOBS

Full-stack Developer

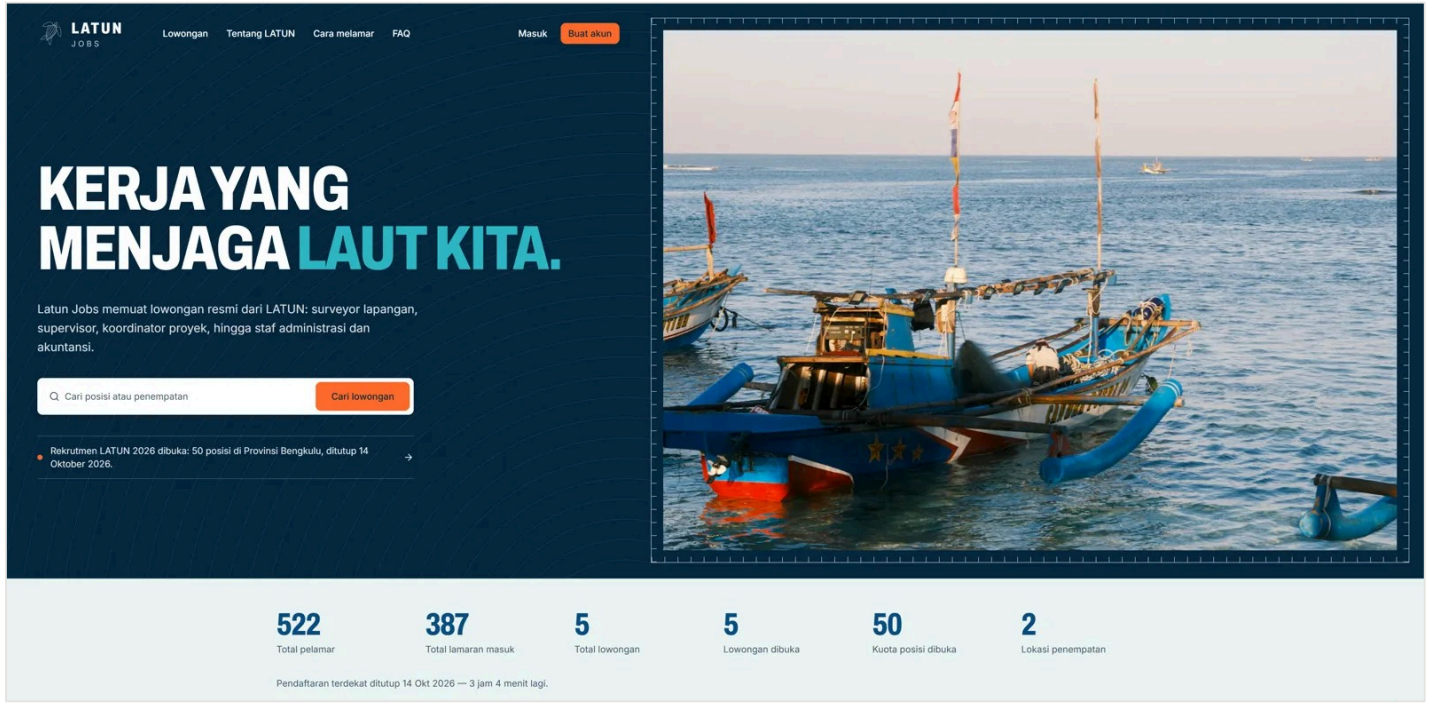

One journey for applicants and reviewers.

Built the applicant-facing experience and the administrative workflow for LATUN's 2026 recruitment program.

- Job board and four-step application wizard.
- Document library, per-application chat, and notifications.
- Vacancy management and sequential review queue.

TECHNOLOGY

React 19 · TanStack Start · Laravel 13
Sanctum · MySQL · Tailwind 4

PUBLIC JOB BOARD AND COASTAL-IDENTITY LANDING PAGE

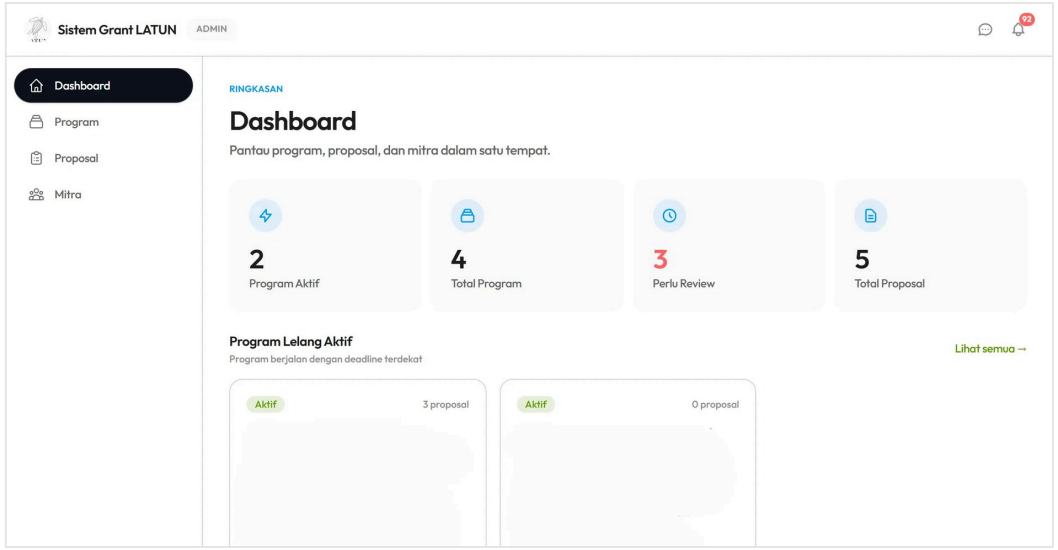

job.latun.or.id

Tools for conservation teams.

Connected public communication and grant-management platforms for Laut Untuk Negeri.

Grant LATUN

Full-stack Developer

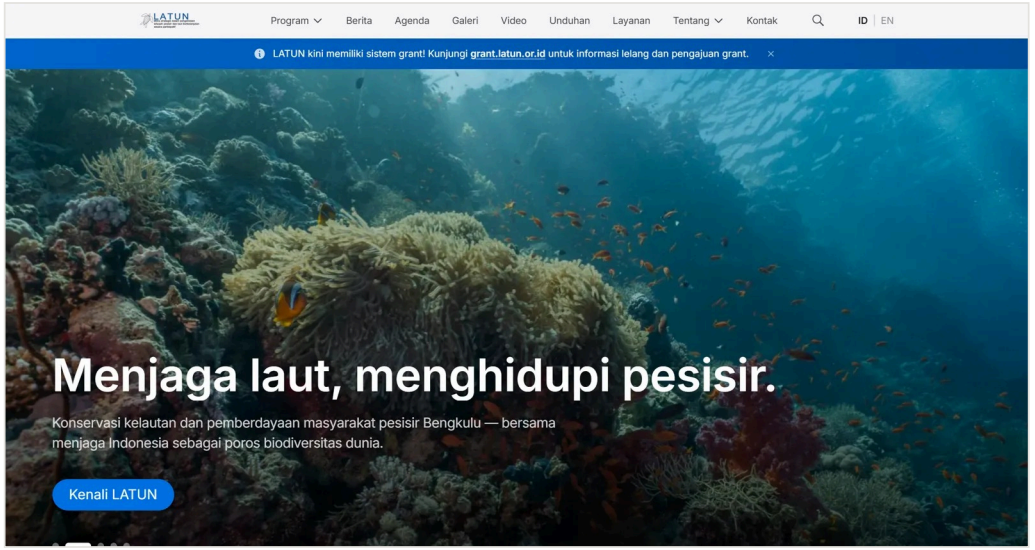

ADMIN DASHBOARD DETAIL

Admin and partner portals; six-step proposals, 12-document verification, DOCX legal documents, and reporting.

grant.latun.or.id — Laravel / Vue

LATUN Website

Full-stack Developer

PUBLIC WEBSITE DETAIL

Built ID/EN pages for programs, news, events, galleries, downloads, services, and grant information.

latun.or.id — Laravel / Livewire

Software for smarter farm operations.

Chikora · Mobile foundations, web presence, and the original backend and telemetry services.

PT RAFFLESIA AGRO INVESTAMA

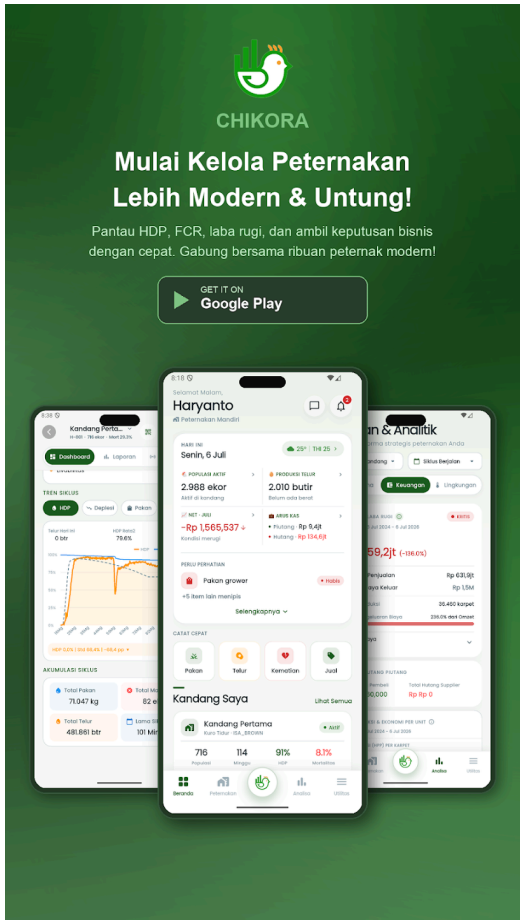

Connected mobile, web, and IoT engineering.

Built the initial Flutter foundation for flock logging, feed and mortality records, analytics, and offline synchronization before production expansion.

- Developed Go (Chi v5) REST APIs with PostgreSQL.
- Built MQTT telemetry pipelines connecting ESP32 sensors and actuators.
- Created the Next.js and Supabase web showcase.

TECHNOLOGY

Flutter · Go · PostgreSQL · MQTT · ESP32 · Next.js

INITIAL MOBILE FOUNDATION

Product preview from the portfolio.

Historical backend work: the original API was superseded; the MQTT service is offline.

View app listing

Recruiting workflows, with AI assistance.

Yena AI · Early feature development for an AI-powered recruitment SaaS platform.

FULL-STACK DEVELOPER / FREELANCE

Jan — Nov 2025 · Upwork

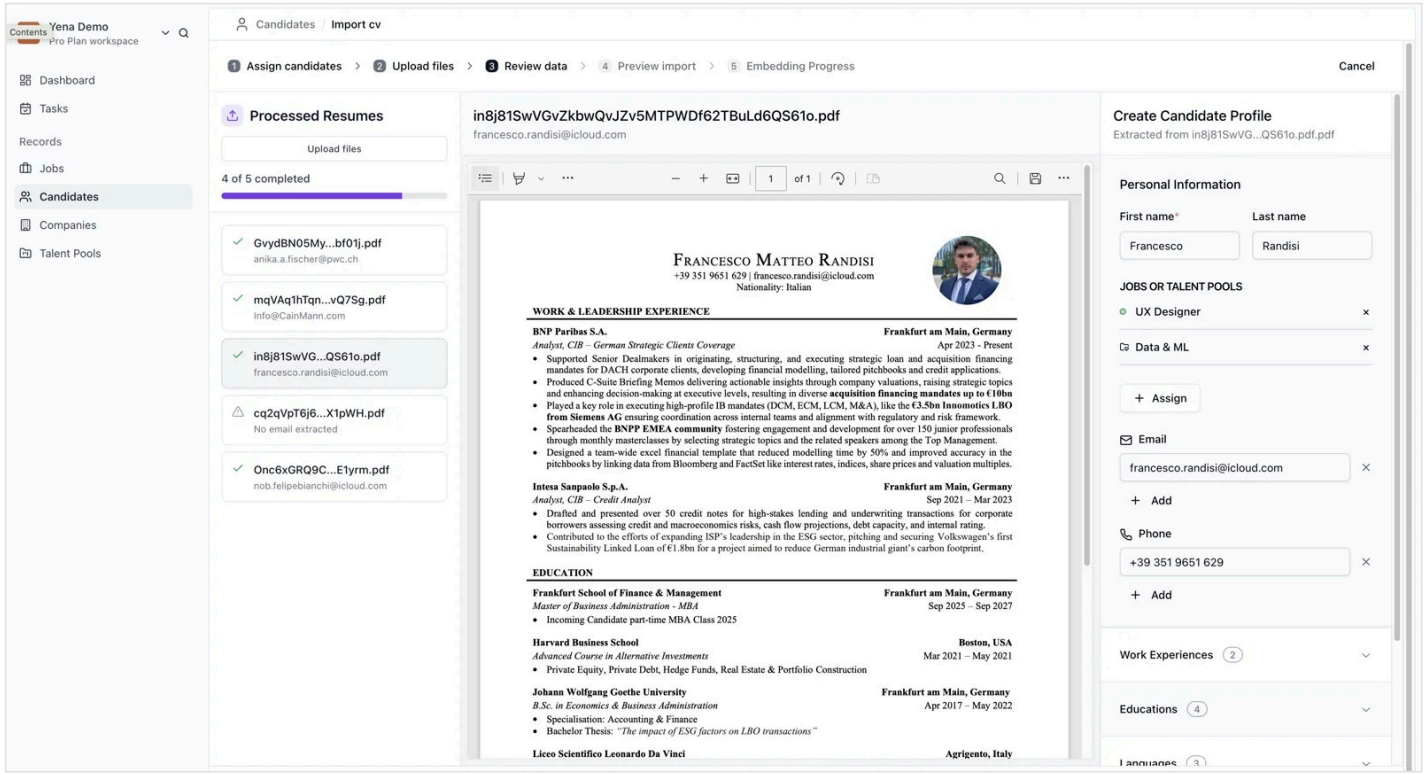

From CV processing to candidate matching.

Contributed initial features before handing off to the core team.

- BullMQ parsing and multi-provider OCR.
- OpenAI vector similarity search and real-time SSE streaming.
- Stripe subscriptions, talent pools, and kanban pipelines.

TECHNOLOGY

Next.js · Express · BullMQ · OpenAI
Stripe · Turborepo

CV PARSING AND CANDIDATE DATA REVIEW

yena.ai

Make every application more deliberate.

SuratLamaran · A local-first workspace for CVs, cover letters, and freelance proposals.

SURATLAMARAN

Full-stack Developer

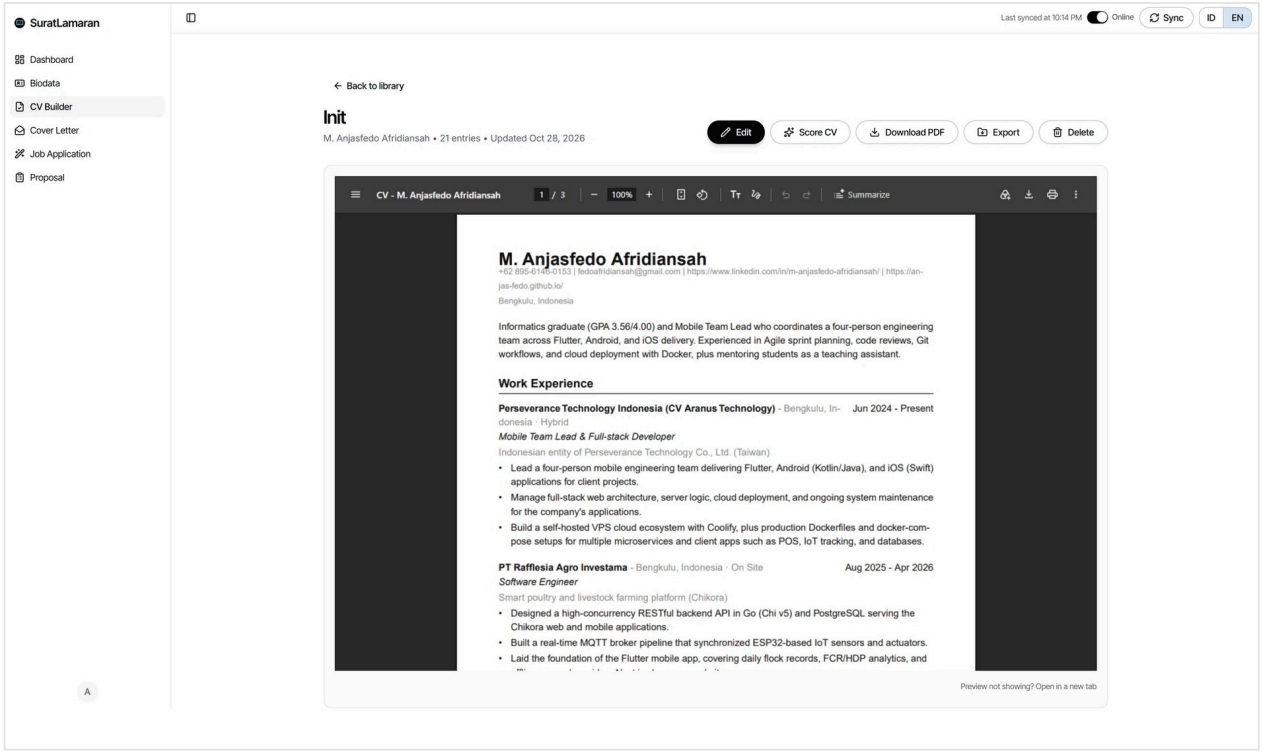

Reusable information. Tailored documents.

Built a job-application toolkit that combines reusable biodata with role-specific documents and application tracking.

- CV and cover-letter builders with PDF export.
- Proposal budgets, browser OCR, and reviewable copy-paste AI workflows.
- Offline-capable cloud synchronization.

TECHNOLOGY

React 19 · TypeScript · TanStack
Appwrite · Cloudflare Pages

DOCUMENT PREVIEW, SCORING, AND PDF EXPORT

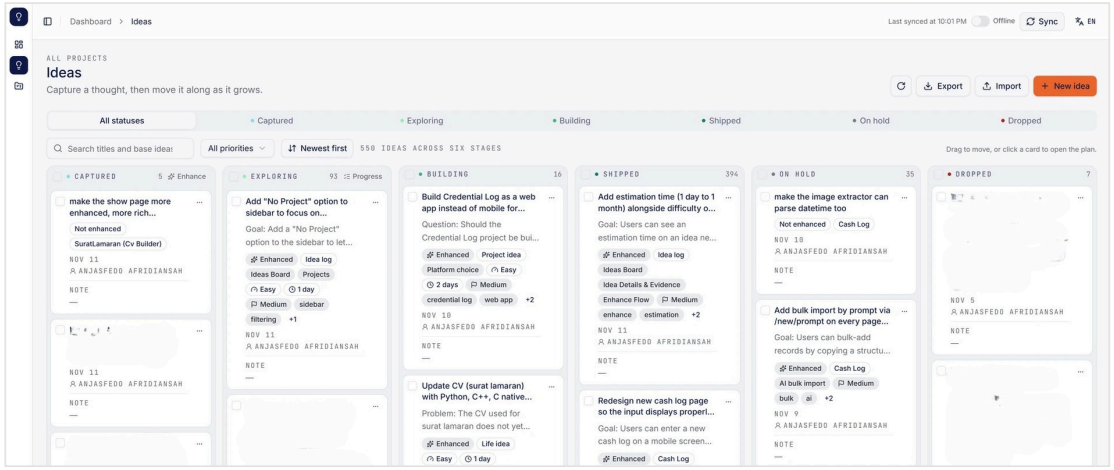

suratlamaran.my.id

Capture ideas. Understand cash flow.

Two offline-first applications built around everyday workflows and reviewable AI assistance.

Idea Log

Full-stack Developer

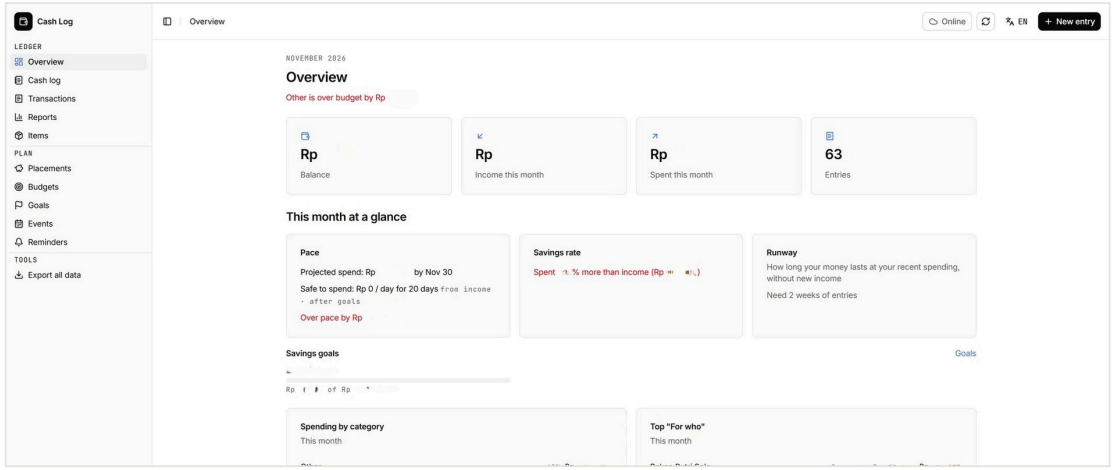

Project-scoped idea boards, progress dashboards, reviewable enhancements, resumable plans, and portable exports.

React · TanStack Start · IndexedDB
Firebase Auth / Firestore

idea-log.pages.dev

Cash Log

Full-stack Developer

Daily entries, transfers, budgets, savings goals, trips, receipt attachments, and cash-flow reporting in rupiah.

React · TanStack · Supabase
PostgreSQL · Cloudflare Pages

cash-log.pages.dev

From application code to deployment.

Containerized delivery and cloud-native backend architecture.

ARANUS TECHNOLOGY / DEVOPS

A self-hosted platform for application delivery.

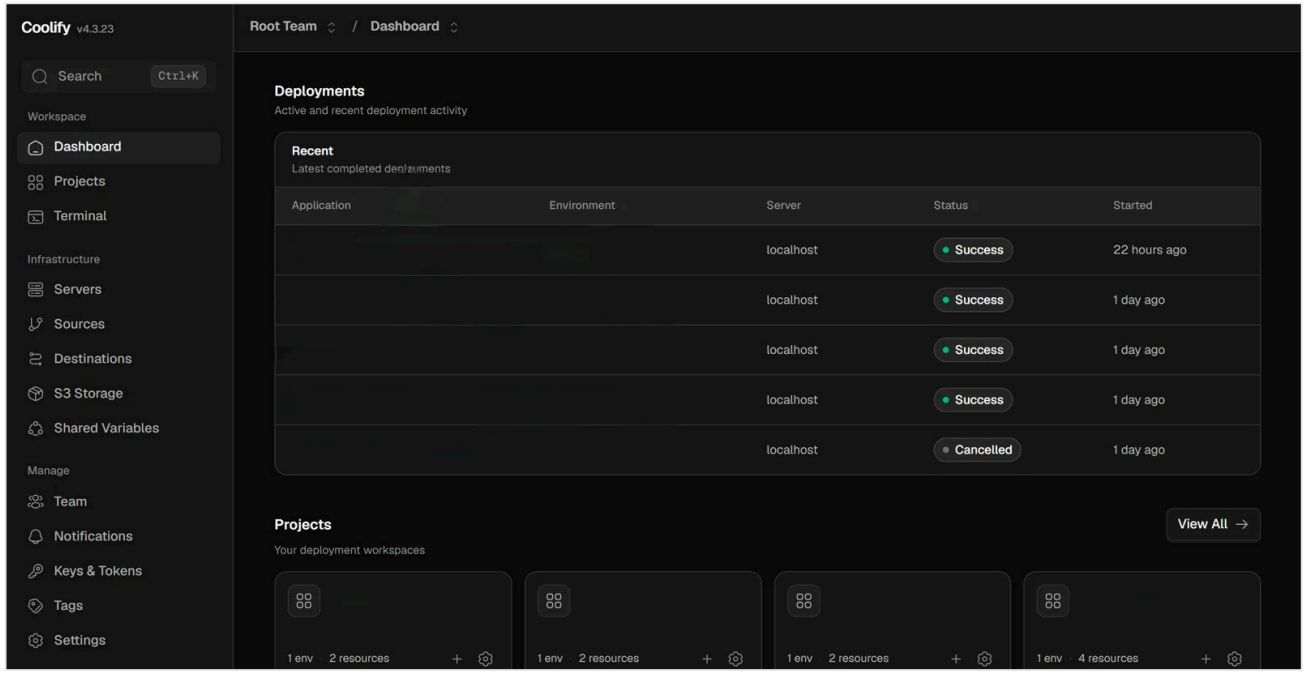

Designed and deployed a Coolify PaaS environment on a VPS for microservices and client applications.

- Production Dockerfiles and Compose configurations.
- Automated deployments, SSL routing, and server orchestration.

TECHNOLOGY

Coolify · Docker · Docker Compose
VPS · CI/CD

aranustech.co.id

PULIH APPS / BANGKIT 2024 CAPSTONE

Django REST backend on Cloud Run and Cloud SQL; APIs, authentication, IAM, and serverless deployment.

View capstone repository

A foundation in software and cloud.

Formal education, practical bootcamps, and selected course certificates.

EDUCATION & PROGRAMS

Bachelor of Informatics

Universitas Bengkulu

Aug 2021 — May 2026

Software engineering and computer networking projects.

Talenta Cloud Academy

Solutions Architecture, DevOps & SRE

Jul 2024 — Jan 2025

AWS infrastructure, containers, and reliability automation.

Bangkit Academy

Cloud Computing Cohort

Feb — Jun 2024

Google Cloud architecture and infrastructure deployment.

SELECTED COURSE CERTIFICATES

Google Cybersecurity Specialization

Google · Jul 2024

Google IT Support Specialization

Google · Jul 2024

Google Cloud Computing Foundations

Google · Mar 2024

AWS Cloud Quest: Cloud Practitioner

Amazon Web Services · Jul 2024

Become a Google Cloud Engineer

Dicoding Indonesia · May 2024

Learn to Build Flutter Applications for Beginners

Dicoding Indonesia · Jan 2025

Let's build something useful.
